

GOHAR KHAN AWAN

FULL-STACK ENGINEER | AI SYSTEMS BUILDER

Karlsruhe, Germany | +49 152 24967965 | gohar@goharawan.com | goharawan.com | LinkedIn | GitHub

PROFILE

Full-stack engineer with 3+ years of experience shipping production APIs, analytics systems, automation platforms and AI-integrated applications. Uses TypeScript for application code and Python for AI and data systems. Builds LLM agent workflows, RAG pipelines, event-driven services and measurable products used by real users, with testing and observability designed in from the start.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL

Frontend: React, Next.js, state management, reusable component architecture, Web Workers, HTML/CSS

Backend & APIs: Node.js, Express, REST API design, PostgreSQL, MongoDB, event-driven architecture, JWT authentication

AI & Agent Systems: LangChain, LangGraph, OpenAI API, Claude API, RAG pipelines, tool-use and agent workflows, prompt engineering, MLflow

Data, ML & Analytics: Pandas, NumPy, scikit-learn, XGBoost, LightGBM, TensorFlow/Keras, Power BI, GA4, Matomo, A/B testing

Infrastructure: Docker, AWS, Kubernetes (working knowledge), CI/CD with GitHub Actions, Sentry, PostHog, Linux, Render

EXPERIENCE

Co-Founder & Operations Lead - Interdigital Limited, Islamabad, Pakistan

Jun. 2022 - Feb. 2025

- Led a 22-person team from ambiguous requirements through implementation and production monitoring; built ML/DL automation with XGBoost, LightGBM and TensorFlow/Keras for real-time decision pipelines.
- Drove \$287K+ profit across 87M+ user sessions on systems architected and owned end-to-end.
- Owned analytics strategy and KPI reporting; translated attribution, funnel and performance data into budget and product decisions.
- Designed systematic A/B tests and used statistical analysis to evaluate impact; surfaced operational risk early and improved processes through incident reviews.

SELECTED PROJECTS

AnalyzeBankStatement.com - GenAI Knowledge Platform

Feb. 2026 - present

- Built an LLM extraction and RAG pipeline with LangChain, LangGraph and the OpenAI API that turns unstructured documents into structured data and supports agent tool use.
- Built the React frontend, Python backend and PostgreSQL data layer; deployed on AWS with PostHog and Sentry observability; cut inference cost by 50% through prompt caching.

MyChatWrap.com - TypeScript Analytics SPA

2026

- Built a Next.js and TypeScript application with a unit-tested parsing, analytics and scoring engine, Web Worker compute isolation, JWT authentication and Docker deployment.

VisaAutomate.com - Distributed Real-Time Platform

Oct. 2024 - Jan. 2025

- Built an event-driven automation platform with queue-based agent coordination and adaptive rate limiting; reached 800 users in two weeks and \$10K first-month revenue.

EDUCATION

M.Sc. Data Science & AI in Business Management - Hochschule Furtwangen

2025 - 2027

In progress; expected 2027. Focus: AI systems, agent architectures, retrieval pipelines, distributed systems, statistical methods and business analytics.

B.E. Mechanical Engineering - NUST, Pakistan

2017 - 2021

Completed. Foundation in applied mathematics, statistics, data interpretation and engineering discipline.

ADDITIONAL INFORMATION

Languages: English (C1+), German (A1), Urdu (native) | **Work authorisation:** Valid German student visa; authorised to work
